EDUCATION

McMaster University

2020 - 2025

B.Eng. Software Engineering (3.4/4 GPA)

Hamilton, Canada

EXPERIENCE

Icon Train Smarter Ltd

July 2025 – Present

Product Manager

United Kingdom (Remote)

- Spearheaded the 0-to-1 development of a scalable mobile fitness application, directing frontend and backend teams through the full product lifecycle.
- Established Agile workflows, translating complex product requirements into actionable tasks and tracking deliverables to consistently meet critical release deadlines.
- Managed full-cycle recruitment and operations for a team of full-time employees and contractors, overseeing everything from job postings to payroll and software administration.

Sanofi Pasteur

September 2023 – August 2024

Co-op, Analyst (SAP S4/HANA Key-User)

Toronto, Canada

- Led a process improvement initiative that eliminated a backlog of 255 critical system errors, achieving a 100% reduction and enhancing process reliability for key supply chain functions.
- Conducted root cause analysis to design quality assurance routines and implement new business processes, preventing recurrence of critical errors.
- Developed subject matter expertise in core SAP business processes related to supply chain and production, acting as a liaison between business stakeholders and technical support teams.
- Developed an inventory tracking and forecasting tool, reducing overstocking and shortages.

Eastern Bank Limited

May 2023 – August 2023

Intern, Business Intelligence

Dhaka, Bangladesh

- Spearheaded the migration of 1800+ reports to their new BI software, optimizing the business intelligence reporting process, improving data accessibility and efficiency.

PROJECTS

id8 (Next.js, FastAPI)

An AI-powered platform that transforms natural language prompts into production-deployed full-stack web applications. Orchestrates a 10-node state machine pipeline handling requirements generation, code generation, security scanning, and automated deployment to Vercel. Built with Next.js 15, FastAPI, PostgreSQL, and Google Gemini API.

E-Predict (Next.js, Flask)

An AI-driven energy consumption forecasting tool using machine learning models. Flask backend for data processing and model deployment; Next.js frontend with interactive visualizations for anomaly detection.

SyncMaster (Next.js, AWS)

Project for the City of Hamilton

A web app for a public sector client to digitize workflows, improving documentation management and contractor efficiency. Built with Next.js, Material UI, TypeScript frontend and Python AWS backend (DynamoDB, Cognito, Lambda).
